

woodworkers door and window innovations

THE
WOODWORKERS
COMPANY

Our aim is to offer design choices that
exceed your expectations but not your budget

Contemporary

RANGE

Woodworkers contemporary collection introduces a range of visually arresting entrances to add spice and soul to modern design. Their simple clean geometrics aim to welcome the visitor with style and innate warmth. The range skillfully combines perfect proportions with a palate of innovative materials to create doors with unique individuality and character. Naturally, every design can be framed & hung to suit your needs & enhance your particular architectural style.

grand mediterranean arch entry

An entrance is more than a door. The rich detail of Mediterranean entries and the distinctive character of Victorian & Federation entrances is achieved by the skillful design of the supporting framework to enhance & compliment the style of the doors used. Woodworkers entrances stand apart by their careful and authentic attention to detail and are custom built to suit any architectural application.

Mediterranean

RANGE

The strength and elegance of European doors is recreated evocatively in woodworkers mediterranean range. This unique range infuses the rich detail of sinuous wrought iron, delicate beveled glass and heavily machined solid timbers to produce doors that capture the true European spirit. Our workshops are renown for producing Australia's best entrances incorporating traditional overmantles, ornate transoms and heavy bollection mouldings to showcase the rare beauty of our mediterranean designs.

Antique Doors

Heritage

RANGE

Woodworkers Heritage range stands apart for its authenticity. Each design has been researched from original examples and constructed to faithfully reproduce their detail and proportions. Careful attention has been paid to the strength of mouldings, originality of leadlight designs and the generosity of timber sections. Traditionally, the entry door is the most elaborate door in the house and personifies its architectural style. Woodworkers has been making doors since 1928 and while others mimic our designs, we can uniquely claim to have made the originals.
